Utkarsh **Sahay**

Software Engineer | Backend, Full Stack & Applied AI

utkarshsahay674@gmail.com | +91-9905535123

EDUCATION

Birla Institute of Technology Mesra
B.Tech. in Computer Science and Engineering
Nov 2021 – Oct 2025
Ranchi, India

CGPA: **9.11/10**

TECHNICAL SKILLS

Languages
Python, C++, Java, TypeScript, JavaScript, SQL

Backend & Databases
Node.js, Express.js, Prisma, MySQL, MongoDB, Redis

Frontend
React, TypeScript

Data Engineering
Spark, PySpark, Snowflake, Airflow, ETL Pipelines

Cloud & DevOps
AWS, Azure, Docker, GitHub Actions, CI/CD

AI & Machine Learning
Gemini API, Google GenAI, KNN, CNN, OpenCV

Engineering Fundamentals
Data Structures & Algorithms, OOP, System Design, REST APIs, Authentication, RBAC, Integration & E2E Testing

ACHIEVEMENTS

LeetCode Global Rank 107
Among **35,000+ participants** in Biweekly Contest 184.
Rating: **1838**

Dean's Top 10%
Recognized for academic performance.

GP Birla Scholarship
Awarded **twice** for academic performance.

EXPERIENCE

SPM Medicare Pvt. Ltd.
Software Engineer
Aug 2026 – Present | Noida, India

- Developed **Glovia**, a multi-tenant B2B/B2C marketplace with **four role-based portals**, using **React, TypeScript, Node.js, Prisma and MySQL** to connect buyers, sellers, logistics and operations.
- Built **REST APIs** and transactional data models for catalogue, cart, bulk ordering, quotations, purchase-order conversion and scheduled purchasing; enforced buyer purchase limits, seller approvals and company verification.
- Implemented **tenant isolation, RBAC**, authenticated routes and API validation; added automated cross-account access checks.
- Integrated a **Gemini-powered AI assistant** for natural-language product discovery and catalogue navigation, plus ERP/inventory synchronization and four-stage logistics tracking.
- Connected inspection outcomes to **dispatch controls** to block shipments after failed inspections; centralized order messaging, notifications and dispute-management workflows.
- Integrated **Stripe payments** and multi-currency pricing; implemented payment reconciliation, refund tracking and itemized seller-fee records for financial traceability.
- Containerized services with **Docker** and automated CI/CD using **GitHub Actions**; added integration and end-to-end tests covering critical workflows, reconciliation and provider-failure recovery.

SynapseHealthTech
Software Engineer
Dec 2025 – Aug 2026 | Remote

- Engineered **BankAbility**, an accessibility-first Open Banking platform, with a **KNN-based UAES/SAES pipeline** for user-cohort prediction and adaptive interface recommendations.
- Designed a mathematical scoring model to aggregate accessibility signals across sessions and personalize **Android and Web** user experiences.

Sigmoid Analytics
Data Engineer Intern
Jan 2025 – Jul 2025 | Bengaluru, India

- Implemented **ETL transformations**, joins, aggregations and validation with **Python, SQL, Spark and PySpark**; used **Azure, Snowflake and Airflow** for cloud processing and orchestration.

Intrainz
Machine Learning Intern
Dec 2022 – May 2023 | Remote

- Built a **CNN-based dress-recognition workflow**; preprocessed **500+ images** using OpenCV for cleaning, resizing and grayscale conversion, achieving approximately **85% test accuracy**.

PROJECTS

RoleFit AI
React | Node.js | Express.js | MongoDB | Google GenAI

- Built an AI interview-preparation platform with **8 REST APIs**, **4 protected routes**, JWT/bcrypt authentication and validated resume uploads up to **3 MB**.
- Integrated **Google GenAI** for job-match scores, interview questions, skill-gap analysis, preparation roadmaps and **ATS-friendly resume PDF exports**.
